Glossary of Terms

Please see table below with definitions for various jargons utilized throughout this documentation.

Term	Definition
Ad Campaign	<i>Marketing campaign is an online marketing effort put forward by a company to drive engagement, conversions, traffic, or revenue.</i>
Android	<i>An open-source operating system managed by Google used for smartphones and tablet computers.</i>
cPanel	<i>cPanel is a web-based hosting control panel provided by many hosting providers to website owners allowing them to manage their websites from a web-based interface.</i>
Cloud	<i>General term for anything that involves delivering hosted services over the Internet. These services are broadly divided into three categories: Infrastructure-as-a-Service (IaaS), Platform-as-a-Service (PaaS) and Software-as-a-Service (SaaS).</i>
Dashboard	<i>A data dashboard is an information management tool that visually tracks, analyzes and displays key performance indicators (KPI), metrics and key data points to monitor the health of a business, department or specific process.</i>
Data Mining	<i>Data mining is defined as a process used to extract usable data from a larger set of any raw data. It implies analysing data patterns in large batches of data using one or more software</i>
DNS Provider	<i>A DNS hosting service is commonly provided by a domain name registrar, which often uses a backend server to provision services to Web hosting providers and ISPs.</i>
domain	<i>a distinct subset of the Internet with addresses sharing a common suffix or under the control of a particular organization or individual.</i>
E-Commerce	<i>Commercial transactions conducted electronically on the Internet.</i>
envasio	<i>IT managed services and software solution company owned by Geminos Group (Geminos Digital Solutions Limited) primarily located in Kingston, Jamaica.</i>
merchant	<i>a person or company involved in wholesale trade, especially one dealing with foreign countries or supplying goods to a particular trade.</i>
iOS	<i>an operating system used for mobile devices manufactured by Apple Inc.</i>
p.a.	<i>Short for per annum denoting payment is incurred yearly.</i>
PayPal	<i>PayPal is an online service allowing users to transfer money without sharing financial information with the recipient. Users pay for transactions through credit/debit cards, bank accounts, PayPal accounts or financing.</i>

Power BI	<i>Power BI is a business analytics service by Microsoft. It aims to provide interactive visualizations and business intelligence capabilities with an interface simple enough for end users to create their own reports and dashboards.</i>
SharePoint	<i>SharePoint is a web-based collaborative platform primarily sold as a document management and storage system, but the product is highly configurable and usage varies substantially among organizations.</i>
SSL	<i>SSL (Secure Sockets Layer) is the standard security technology for establishing an encrypted link between a web server and a browser.</i>
SSRS	<i>SQL Server Reporting Services (SSRS) is a server based scalable and extensible platform for authoring, deploying, executing and managing reports based on a variety of data sources</i>
Stripe	<i>Stripe is a powerful and flexible tool for internet commerce. Whether you're creating a subscription service, an on-demand marketplace, an e-commerce store, or a crowdfunding platform, Stripe's meticulously designed APIs and unmatched functionality help you create the best possible product for your users.</i>
Tableau	<i>Tableau is a powerful, secure, and flexible end-to-end analytics platform for your data. Elevate people with the power of data. Designed for the individual, but scaled for the enterprise, Tableau is the only business intelligence platform that turns your data into insights that drive action.</i>
